

SIG-Neuropathic pain 2019-2020- Activity:

The main objective of the SIG is to publish guidelines on diagnosis and treatment of neuropathic pain. The guidelines have not been revised yet.

The SIG members were active in spreading the awareness and knowledge about neuropathic pain through conferences and publications

- Swiss Neuropathic pain guideline promotion:

The guidelines were promoted at different conferences and courses for general practitioner and health care providers.

-Publications on neuropathic pain:

Among others:

-Revue médicale Suisse. 2020 Jul 15;16(700):1363-1366.

Medical cannabinoids and their indications in chronic pain. El- Faleh-Kayal Y, **Suter M**, Cachemaille M.

-Revue médicale Suisse. 2019 Jun 19;15(656):1254-1258.

Physical activity and analgesia : mechanisms and clinical implications. D'Andrea A, **Suter MR**.

Miscellaneous:

No SIG meeting during the year was scheduled for the members in the absence of new points to discuss that could not be done by email.

No official meeting during the congress due to the one day format.

PD Dr Marc Suter, president of the SIG neuropathic pain, 15.09.2020
