

## **SIG Integrative Pain Management**

There are two mains of the SIG:

- 1) Suggest conference speakers or/and workshop/symposium related to integrative pain management, for the SPS Annual Congress.
- 2) Develop a network of practitioners and scientists in the field of pain management working with or investigating integrative medicine and complementary medicine

During 2023, the SIG had no formal meetings.

As 2023 has been declared “Global Year of Integrative Pain Care” by the IASP, the SIG participated in the scientific committee of the SPS congress with the theme “Integrative Pain Management” and not only one topic – as in the 1<sup>st</sup> aim of our SIG – but the whole of the congress has been suggested.

As for the second aim, 2023 will give us the opportunity to hold our first SIG meeting, hoping to meet new participants interested in this topic, to go on and develop further the SIG.

Dr. med. Noëmi Zurrón, SIG Integrative Pain Management, November 2023
